

Frequently Asked Questions

GFC TOKEN SALE

- Token release to all users who are confident to handle ERC 20 tokens: **05 March onward**
- A total of 50 million tokens are issued (no decimals) based on ethereum digital currency. 50% of the issued tokens are placed on the market. It is possible to contribute in the company under the legal formula of bearer shares that are identified by an according amount of GFC tokens.

BUSINESS LINES OF THE COMPANY

Greek Food Corridors' (GFC) main business activities are in the field of developing and implementing the next generation of e-Auctioning infrastructure for fruit, vegetables, flowers and olive oil in Greece and the Balkan region. GFC will use Aucxis' new cloud-based e-auction clock and information system to market these agricultural products, while expanding the auction network to the Balkan countries, Serbia, RMC, Albania, Croatia, Romania... The state-of-the-art Cloud based e-auction platform will facilitate the task of finding buyers and sellers, allowing them to negotiate simultaneously and in real time on the trading screen.

WHAT ARE THE MAIN ADVANTAGES OF GFC E-AUCTION NETWORK?

GFC International Agri-food e-auction platform (INAP) is a unique initiative established in Greece & the Balkans. It integrates & coordinates the actual Agri-food spot markets with the nationwide network of product supply, cold storage logistics, SPs, CQ agencies and Transport companies to provide rapidly the best quality product at your doorstep.

GFC is providing a real marketing solution to the Greek & Balkan Agricultural sector, bringing supply and demand together in a transparent and fair way. GFC cloud base e-auction platform secures product flow and generate a correct price for both the suppliers and buyers through the auction clocks. The new infrastructure & price discovery mechanism will guarantee that growers are correctly paid and treated, and that buyers will always receive quality products.

A big advantage of the new infrastructure, especially for the small and medium-sized farmer's cooperatives and Group of Producers, is the fact that they will be able to negotiate directly with buyers, both at a national and international level, under the same conditions as larger companies. GFC members will be able to benefit from economies of scale as well as marketing power.

GFC e-auction platform will be a huge step to empower Greek & Balkan farmers. Traders will bid online from anywhere in the world and farmers & farmer's association will have secure product flow and a fair price for their products. This will lead to "scientific" price discovery by the farmers themselves, breaking the hold of middlemen.

HOW MUCH TOKENS ARE FOR SALE?

We are selling 50 Million GFC Tokens.

Hard Cap: 25.000.000 € Soft Cap: 1.000.000 €/\$

WHY GFC PROJECT CAN SUCCEED?

GFC project has an actual value and can succeed because it has immediate application in the real world, the real market, and the real economy.

GFC concept & functionality is based on a proven and working product/technology which brings solution to the long time problems faced by Greek and Balkan farmers. More than 150 e-auction houses for Fruits& vegetables and other commodities have been implemented in Europe for many years by aucxis Belgium (www.aucxis.com) with success.

It brings a real Solution in order to cover a real need: GFC infrastructure is providing a Real solution to the Agricultural sector & the farmers of Greece & the Balkans, bringing supply & demand together in a transparent way, and securing product flow and a fair price for both the suppliers & buyers.

GFC has secure adequate participation from the Nationwide & International Suppliers (group of producers & major farmer's collectivities), making the project viable. GFC project is a valuable long term project that can support its Token to perform better and better each year. Therefore, there is value in holding it (=dividend share, inflation benefits).
